

D9X BREATHABLE

"When Extended Expectations Faces Reality"

A Strengthened Quad-Lam Breathable Ultra-Light Drysuit

Based on the world's first Ultra Light D9 Drysuit Concept from Waterproof, the D9X Extended Breathable Drysuit features some technical improvements designed for the needs of professional and serious divers. As a leisure diver, you can always decide NOT to dive if environmental or weather issues are of concern or if you don't want to abuse or risk your equipment. But for professional divers this is not always a choice. To meet their need for equipment that has extra reinforcement, Waterproof R&D redesigned the standard D9 suit and found a way to strengthen some areas without jeopardizing the most important feature of the suit: the Ultra-Light Concept.

The suit features newly developed stronger laminated material, same as we use in our military suits, extra reinforcement from the elbows to the new Zip-Off neoprene warm cuffs, which are designed to accept readily any dry glove system. Extra reinforced lower back and knees, lightweight pockets on both legs (featuring two cord loops on each), and delivered with XLITE Soft Boots. Yes, the D9X Extended Breathable Drysuit weighs slightly more than the exceptionally Ultra-Light standard D9 Drysuit but we know that true professionals are willing to carry a little extra weight in exchange for added performance.

Included:
Suspenders
Low pressure hose
Mesh bag
Repair Kit

KEY FEATURES

- 4-Layer Breathable Ultra light shell
- TIZIP Master Seal Front zipper
- Soft light weight Boots
- Reinforced knees, elbows and back
- Prepared for Dry Glove system
- Dual light weight pockets
